

STEMplify KITS

Amplifying skills through STEM Learning & Competition

Globally acclaimed STEM programs, enhanced with the engaging STEMplify BOOK and a BOX full of exciting products for classes I-V.

Make your school NEP 2020 and NCF 2023 ready.

STEMplify  is home to

WORLD'S LARGEST STEM CHALLENGE

Offering GLOBAL PROGRAMS.

Programs: Grade 1 to 5 in STEMplify KITS

Young students engage in hands-on STEM activities tailored for Grade 1, building their foundational understanding of science, technology, engineering, and math. This program sparks curiosity and creativity.

An exciting STEM project where young students design, build, and race miniature cars inspired by F1®. This hands-on experience introduces them to the basics of STEM.

Drone Wars is an engaging, hands-on STEM program where students learn the basics of drone technology and flight principles through interactive activities.

A hands-on STEM curriculum where students design, build, and explore civil engineering concepts using 3D design tools and roller scales.

A global STEM challenge where students design, test, and race miniature F1® cars, engaging in hands-on, practical learning aligned with their developmental levels.

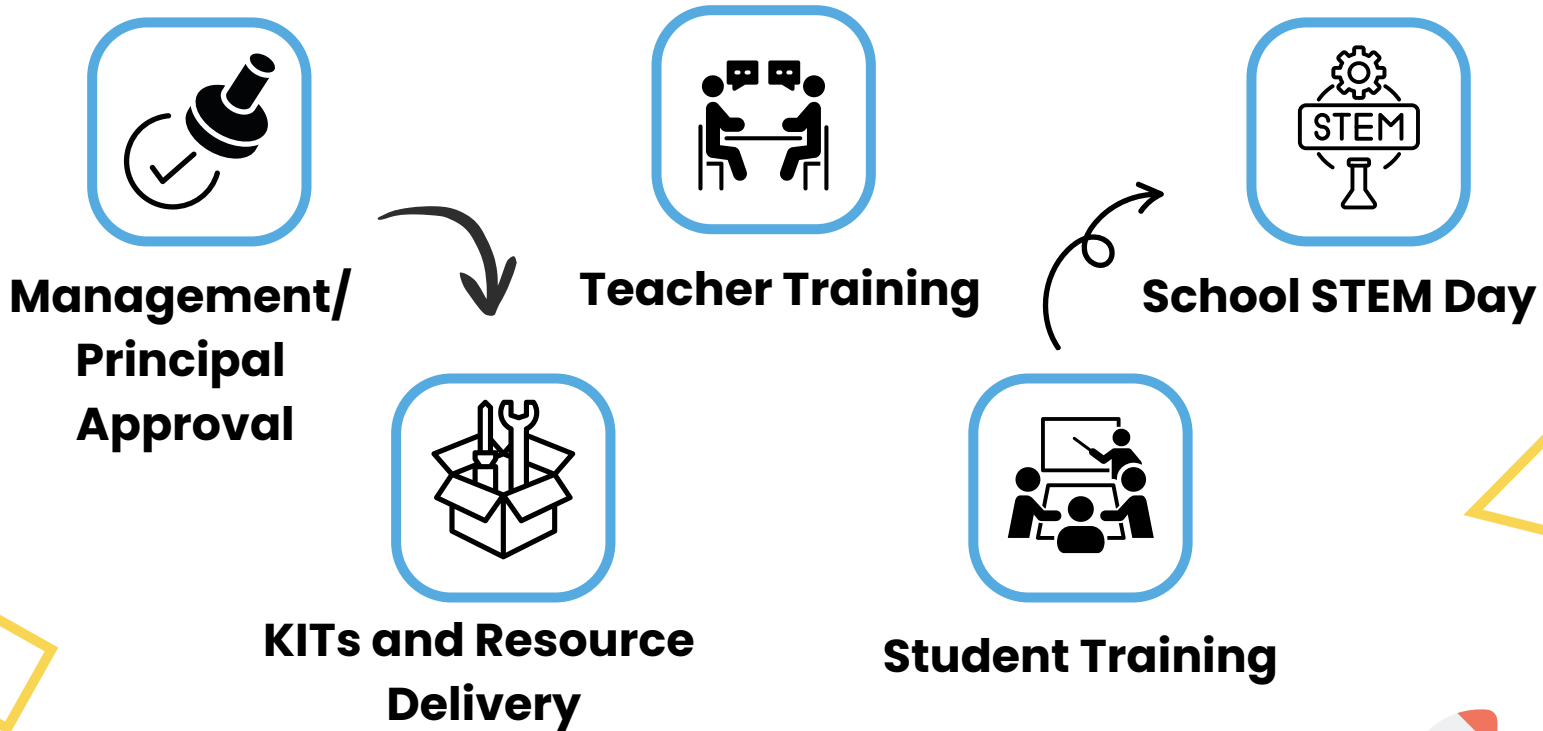

KEY FEATURES:

1. The most innovative and unique STEM books with a comprehensive activity kit alongside.
2. Designed to address all STEM needs with unmatched creativity and effectiveness.
3. Includes a **'Train the Trainer'** manual, providing step-by-step guidance.
